

THE COMPLETE HSE RISK MANAGEMENT SOLUTION

SCHEDULE EVENTS, TRACK DATA, SEND ALERTS AND RESOLVE ISSUES EASILY

INCIDENTS & INVESTIGATIONS

- Record incidents, audit findings, legal claims, customer complaints and investigations
- Control, monitor and analyse trends in detail
- Determine root causes to take informed action

ACTION MONITORING

- Record, assign, reallocate, and track actions with person-specific screen alerts
- Reports can be sent to specific persons

INSPECTIONS, AUDITS & CALIBRATIONS

- Schedule, record, and send alerts for inspections, audits, calibrations and events
- All relevant certificates, results and reports are recorded

DOCUMENTS

- Upload and store documents for any incident, action, investigation, training or inspections, for individuals, sites and departments

SAFETY & PRODUCT DATA SHEETS

- Build a central library of safety and product data sheets that are easily accessible and updatable for consistency of reference

ANALYTICS

- Reports are produced by you on an ad hoc basis, with automated exports to Excel
- The possibilities of analysis are virtually limitless

WORK HISTORY

- Information is stored and linked to employees in the database and can be reported on comprehensively

STANDARD OPERATING PROCEDURES

- Set up SOPs and link to site, assets, job titles etc with the ability to archive

TRAINING

- Can be scheduled by roles and departments
- Keeps track of expenses
- All certificates can be loaded onto the system for traceability

CERTIFICATION & COMPLIANCE

- Completely ISO compatible and site specific
- Provides thorough tracking of transactions and documents

WASTE & PPE CONTROL

- All waste products can be monitored safely during disposal
- Provides complete control over all PPE issued and received

ALERTS

- User specific dashboards showing alerts for actions, investigations, monitoring and training
- Options for e-mail and SMS alerts

RISK PROFILES

- Set up and edit Homogenous Exposure Groups (HEGs) per job title linking requirements, exposures and PPE needs
